STATISTICS OF TEACHERS COLLEGES AND NORMAL SCHOOLS, 1925-26

By FRANK M. PHILLIPS

Chief, Statistical Division

Statistics concerning the training of teachers are given in this report. The major items presented include total enrollments; enrollments in teacher-training courses; instructors; graduates; receipts, including sources of support; expenditures; and detailed information regarding demonstration schools and practice teaching. The greater portion of the report is given over to summary and detail tables showing the activities in 402 institutions engaged primarily in teacher training. Supplementary data are presented showing the extent of teacher training in secondary schools and in colleges.

Of the 402 teacher-training institutions, 101 are classified as teachers colleges, 102 as State normal schools, 27 as city normal schools, 108 as county normal schools, and 64 as private normal schools. Reports were received from every institution, but, when data were incomplete, information was taken from catalogues of the institutions and from the 1924 records. The following schools, formerly carried on the State normal school list, have been transferred to the teachers college list since 1924: The State Normal School and Teachers College at Murray, Ky.; the State Teachers Colleges at Moorhead and Winona, Minn.; the State Normal School at Buffalo, N. Y.; the State Teachers Colleges at Mayville and Minot, Dak.; the East Tennessee State Teachers College at Johnson City, Tenn.; the State Teachers College at Murfreesboro, Tenn.; the West Tennessee State Teachers College at Memphis, Tenn.; and the Humboldt State Teachers College at Arcata, Calif. The Cleveland School of Education, formerly on the list of city normal schools, is now on the teachers college list. The teachers college list includes those institutions which offer four years of work above high-school graduation and have authority to grant degrees, and do grant degrees corresponding to first degrees granted by colleges.

One striking change in the teacher-training situation is in the growth of teachers colleges. In 1920, 4 teachers colleges taken from the college and university list, 4 private normal schools, Brigham Young University, and 37 former State normal schools were included on the teachers college list, making a total of 46 in 1920. In 1922, the teachers college list was increased to include 80 institutions. In 1924, 88 institutions, and in 1926, 101 institutions were on the teachers college list.

At the present time eight institutions which have not yet been added to the teachers college list have the legal status of a teachers college.

In 1920, 40.4 per cent of the students in teacher-training courses in normal schools and teachers colleges were in teachers colleges, and in 1926, 62.1 per cent were in teachers colleges, including summer-school students and excluding duplicates.

A summary of statistics concerning teachers colleges and normal schools from 1900, by five-year periods, to date, is given in Table 3. In 1924 there were enrolled in teacher-training courses 245,669 students; in 1926 there were enrolled in such courses 270,206, or 92 per cent of the total enrollment, an increase of about 10 per cent over 1924. This is an increase of 27.6 per cent for men and of 6.3 per cent for women. The increase over 1920 is 99.5 per cent which is 183.7 per cent for men and 85.7 per cent for women. Total receipts for 342 institutions amount to \$64,693,494 for 1926. Forty-two county normal schools and 18 private normal schools did not report receipts.

The following tabulation shows the distribution of teacher-training students in the United States by sex and type of institution for 1894, 1910, and 1926. The record is quite complete for these years, and the periods happen to be 16 years apart, just the regular time required for a child to go through the elementary school, the high school, and the college. In 1894, there were 80,767 students of all kinds training for the profession of teaching, and there existed about 450,000 teaching positions of all kinds. One teacher was in training for every 5.6 positions. In 1910, students to the number of 113,685 were training for about 630,000 teaching positions, or one prospective teacher for every 5.5 teaching positions. In 1926, teacher-training students numbering 494,290 were preparing to take over about 960,000 positions, or one prospective teacher for every two positions. The period of training has increased somewhat during this time in the normal schools, but this has been offset slightly by the increase in teacher training in high schools where a one-year course predominates.

Distribution of teacher-training students in 1894, 1910, and 1926, by sex and type of institution attended

Institutions	1894			1910			1926

¹ Includes teachers colleges.

² Contains 510 women not distributed by public and private colleges.

³ Contains 5,500 not distributed by sex.

A marked increase is noted in the 32-year period in the proportion of students taking teacher training in schools under public control. In 1894, of those taking teacher training in normal schools 57.5 per cent were in public normal schools; 89.5 per cent in 1910 were in public normal schools; and 93.6 per cent in 1926 were in normal schools and teachers colleges under public control. For those in training in high schools, 53.7 per cent were in public high schools in 1894, 77.3 per cent in 1910, and 94.1 per cent in 1926. In colleges and universities, 15.1 per cent were in publicly controlled institutions in 1894, 40.6 per cent in 1910, and 45.6 per cent in 1926.

Another marked change since 1894 is in the number of men among teacher-training students. In 1894, of the students in public normal schools 30.6 per cent were men, 21.4 per cent in 1910 were men, and 20.2 per cent in 1926 were men, although the percentage of men has been increasing since 1918. In private normal schools 50.6 per cent in 1894 were men, 29.7 per cent in 1910, and 18 per cent in 1926. In teacher-training courses in public high schools 27.6 per cent in 1894 were men, 15.9 per cent in 1910, and 14.8 per cent in 1926 were men. In similar courses in private high schools 46.2 per cent in 1894 were men, 27.9 per cent in 1910, and 16.3 per cent in 1926. Students in teacher-training courses in colleges in 1894 were not reported by sex, but the commissioner's report for that year says "but a large proportion of them were males." In 1910, 37.4 per cent were men, and in 1926, 26.3 per cent were men. In 1894 approximately 40 per cent of the teacher-training students were men; in 1910 this had dropped to 22.8 per cent, and in 1926 to 21.7 per cent, although the proportion of men has been increasing since the war period. In 1924 the men were 19.5 per cent of the total. For 1918, 1920, and 1922 complete data are lacking, but in the normal schools and teachers colleges 12 per cent in 1918 were men, 14.1 per cent in 1920, and 16.8 per cent in 1922.

The following table shows the number of public normal schools and teachers colleges and the number of students enrolled in teacher-training courses in these institutions by two-year periods from 1894 to 1926; the same information for private normal schools and teachers colleges, and the enrollment in all types of teacher-training institutions for the same period with the exception of the years 1918, 1920, and 1922.

The Iowa State Teachers College was transferred to the college and university list in 1911, the Colorado State Teachers College at Greeley was transferred in 1912, the State College for Teachers at Albany, N. Y., in 1913, and the George Peabody College for Teachers at Nashville, Tenn., in 1916. These institutions were all transferred to the teachers college list in 1920. The enrollments in these institutions during the years they were on the college and university list have been included in this tabulation.

Enrollments in teacher-training courses in public and in private normal schools and teachers colleges, and in all types of institutions

Year	Public normal schools and teachers colleges		Private normal schools and teachers colleges		Enrollment in all types of institutions training teachers
	Schools	Students	Schools	Students	
1926	334	252,907	68	17,299	494,943
1924	311	229,997	71	15,672	418,533
1922	313	182,386	69	12,148	-----
1920	310	129,706	61	5,712	-----
1918	254	108,663	58	6,700	-----
1916	235	106,771	48	9,475	198,146
1914	236	92,193	48	5,856	122,446
1912	219	85,051	60	7,331	113,114
1910	191	79,220	73	9,341	113,175
1908	183	63,048	70	8,819	92,391
1906	174	58,595	90	10,342	97,257
1904	166	50,373	103	13,254	87,239
1902	163	48,350	119	16,718	94,133
1900	158	46,257	148	23,304	98,342
1898	167	46,245	178	21,293	89,225
1896	160	40,421	169	20,777	84,400
1894	160	37,899	238	27,995	80,767

A greater part of the fluctuation in the number of private normal schools, and likewise in the enrollment during this 32-year period, is due to changes in classification at different times. There had been considerable fluctuation previous to 1894. The report of the Commissioner of Education for 1894 says, "Many of these schools again appear as normal schools."

The following graph shows the percentage change in enrollment in public normal schools and in private normal schools since 1894, taking the 1894 enrollments as bases.

Table 1 gives a summary by States of the number in teacher preparation in the various types of institutions. Table 2 gives a part of the same statistics for high schools and for colleges and universities classified as to public and private control and enumerates the enrollments by sex.

Students in teacher training in public high schools are reported from every State excepting New Hampshire. State laws recognizing such training are either lacking or not enforced in Alabama, Arizona, California, Colorado, Connecticut, Idaho, Illinois, Indiana, Kentucky, Louisiana, Maryland, Massachusetts, Mississippi, Nevada, New Jersey, New Mexico, North Dakota, Oregon, Rhode Island, South Carolina, Texas, Utah, Virginia, and Washington, yet the public high schools in those States reported about 21,000 students in teacher-training courses in 1926. While the States mentioned above do not grant teacher's certificates for work done in high schools, teacher-training courses are no doubt designed to enable prospective teachers to prepare for examinations offered to rural and other grade teachers. In many instances these courses are preparatory to entrance to State normal schools and other higher institutions

engaged in the preparation of teachers. In some schools there is a tendency to include review courses in grade subjects, elementary psychology, and cadet teaching, and call such courses teacher-training work. This latter tendency is not confined to those States that have no legal recognition of teacher-training courses in high schools. Teacher-training students were reported from 3,191 public high schools.

Public high schools report 17,750 graduates from teacher-training courses, 5,144 of these being in States that have not legally authorized the establishment of teacher-training courses in high schools. In Michigan, Minnesota, New York, North Carolina, Ohio, Vermont, and Wisconsin the teacher-training work is given after graduation from the high school.

No data were gathered in 1926 concerning teacher-training work in private commercial and business schools, but 85 schools in 1925 reported that 346 men and 1,488 women were taking work preparatory to teaching. Out of 81 of these schools, 5 have no entrance requirements, 6 require a common-school education, 69 require high-school graduation, and 1 college graduation. The average length of course is 12 months.

PROPERTY

The total value of all property belonging to normal schools and teachers colleges reporting is \$202,630,512. Of this amount, \$21,934,639 represents the value of libraries, apparatus, and machinery; \$161,270,760 the value of grounds and buildings; and \$19,425,113 the value of endowments. Teachers colleges have endowments amounting to \$3,152,848, State normal schools to \$882,027, and private normal schools to \$15,390,238.

OTHER TABLES

Instructors are summarized by States for teachers colleges in Table 4, for State normal schools in Table 9, for city normal schools in Table 13, for county normal schools in Table 15, and for private normal schools in Table 17.

Students are likewise summarized in Tables 5, 10, 13, 15, and 18.

Property is summarized in Tables 6, 11, 14, 15, and 19.

Receipts are summarized in Tables 7, 11, 16, and 19. It is not possible to obtain a complete report concerning receipts of city normal schools, since the funds are collected as a part of the income of a city school system.

Expenditures are summarized in Tables 8, 12, 14, 16, and 20.

Table 21 gives, for each institution reporting, a compilation of the number of full-time deans of women, of part-time deans of women, of resident nurses, and of resident physicians employed by the institutions named. This information was requested by the American Association of Teachers Colleges and is submitted just as the items were reported to the bureau.

The remaining tables, 22 to 35, give information in detail for each of the 402 institutions known to be engaged chiefly in the business of training teachers for service.
